

From MapReduce to Apache Spark: An Ecosystem Evolves

Doug Cutting (@cutting)
Chief Architect / Apache Hadoop Co-founder

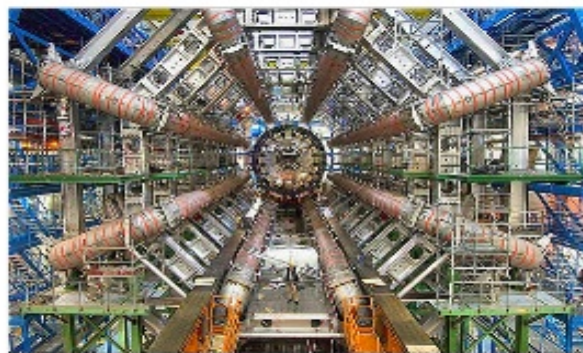

The Merging Ecosystems

The New Use Cases are Amazing

Genomics
(Broad Institute)

Physics
(CERN)

Healthcare Delivery
(CHOA)

New Contribution: *Livy*, an Open Source REST Service for Spark (Alpha)

- For submitting Spark jobs from any web/mobile app, with no Spark client install — enabling new architectures and use cases
- Provides multi-tenancy and fault tolerance to support multiple users reliably
- Works in standalone mode, with YARN, or with Mesos
- No code changes needed
- Apache License. Initial contributors include employees of Cloudera, Intel, and Microsoft + more wanted!

Bring Your Questions About Livy to the Cloudera Booth
